DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group 1 in the reply filed on December 18, 2007 is acknowledged.

Claims 7-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 18, 2007.

Claims 1-6, drawn to a polynucleotide sequence, a probe made from the polynucleotide sequence, and a method of proving parkinsonism inheritance, wherein the method comprises using the probe, are under consideration.

Information Disclosure Statement

Applicant filed an Information Disclosure Statement (IDS) on November 13, 2007. The IDS has been considered.

Specification

37 CFR 1.821(d) states: "[w]here the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description of claims, even if the sequence is also embedded in the text or the description or claims of the patent application.

The nucleotide sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825. Applicant's attention is directed to the final rulemaking notice published at 55

FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking notice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23, 1998).

Page 5 of the specification lists nucleic acid sequences and SEQ ID NOs. must be assigned to them. Each SEQ ID NO. must also be provided on paper and on computer readable format (CRF) and a statement indicating the two are the same must also be provided.

Appropriate correction is required.

The absence of proper sequence listing did not preclude the examination on the merits however, **for a complete response to this office action, applicant must submit the required material for sequence compliance.**

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is drawn to a polynucleotide sequence that comprises "X" as a nucleotide to be substituted. However, in looking at SEQ ID NO. 2, there are no "X"s in the sequence. Claims 2-6 depend on claim 1 and are thus included in the rejection.

Claim 5 is drawn to a method of proving parkinsonism, using the probe of claim 5. There is no probe claimed in claim 5. For purposes of compact prosecution, the Examiner has interpreted the probe to be the probe claimed in claim 4.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. Claim 5 does not indicate how the probe is to be used (e.g., is it used to hybridize to genomic DNA fixed on a membrane, is it used to amplify a sequence in a PCR) and what the result is that the artisan is to look for, such that the result (e.g. increased expression of a gene) is indicative that the patient's sample demonstrates parkinsonism inheritance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Maiti et al., US Patent 6,420,547, patented July 16, 2002.

Maiti et al. teach that their SEQ ID NO. 6 is a 12 nucleotide sequence which has sequence identity to Applicant's 6824-6835 of SEQ ID NO. 2 (see printout of sequence search).

As such, Maiti et al. anticipate the claims.

Examiner's note: Applicant is advised that should claim 4 be found allowable, claim 6 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Conclusion

No claims allowed.
